CONTENTS

Volume 20, Issue Nos 1–12

International Journal of ENERGY RESEARCH

Issue No. 1 JANUARY

The Economic Ripple Effects of Operations 'Desert Shield' and 'Desert Storm': R. Boyd and N. D. Uri 1

On-site Experimental Estimation of Thermal Conductivities and Heat Capacities in Multilayer Walls under Arbitrary Transient Conditions using Explicit and Implicit Finite-difference Schemes: K. A. Antonopoulos and M. Vrachopoulos 17

Martin–Hou, Peng–Robinson and Redlich–Kwong–Soave Equations of State for HFC 125: N. J. Hewitt, J. T. McMullan, R. H. Evans and B. Mongey 33

NO_x Emissions and Thermal Efficiencies of Small Scale Biomass-fuelled Combustion Plant with Reference to Process Industries in a Developing Country: A. Tariq and M. Purvis 41

From Pure Fluids to Zeotropic and Azeotropic Mixtures: The Effects of Refrigerant–Oil Solubility on System Performance: N. J. Hewitt, J. T. McMullan, B. Mongey and R. H. Evans 57

Developments in Iron and Steel Making: T. Zervas, J. T. McMullan and B. C. Williams 69

Issue No. 2 FEBRUARY

The Dynamics of United Kingdom Regional Energy Demand: M. Smyth 93

Improving Coal-fired Power Generation by Integrating PFBC and Gas-fired Combined Cycles in a Hybrid Process: R. H. Evans, J. T. McMullan, B. C. Williams, A. Witthohn, G. Cerri and K. Chapman 107

Techno-economic Analysis of Fuel Conversion and Power Generation Systems—The Development of a Portable Chemical Process Simulator with Capital Cost and Economic Performance Analysis Capabilities: B. C. Williams and J. T. McMullan 125

Development of Engineering Design Data for New Refrigerants I: Pure Fluids and Azeotropic Mixtures: N. J. Hewitt, J. T. McMullan, B. Mongey and R. H. Evans 143

Gas-based Direct Reduction Processes for Iron and Steel Production: T. Zervas, J. T. McMullan and B. C. Williams 157

Issue No. 3 MARCH

Consumer Discount Rates and Energy Carrier Choices in Urban Households: B. Sudhakara Reddy ... 187

Design, Performance and Economics of a Low-cost Solar Wax Melter for the Candle Industry: C. Sethuraman and S. Kumar 197

A Universal Model for Studying the Performance of Carnot-like Engines at Maximum Power Conditions: F. Moukalled, R. Y. Nuwayhid and S. Fattal 203

A Study on the Combustibility of Torrefied Wood Oil/Water Mixture Droplets: V. Q. Vinh and S. C. Bhattacharya 215

A Simple Model for Heat and Mass Transfer in Absorption Cooling Systems (ACSs): I. Dincer and S. Dost 237

R407c as an Alternative to R22 in Refrigeration Systems: B. Mongey, N. J. Hewitt and J. T. McMullan 245

Solid-based Processes for the Direct Reduction of Iron: T. Zervas, J. T. McMullan and B. C. Williams 255

Issue No. 4 APRIL

The Science and Technology Priority Areas Relevant to the Non-conventional Energy Goals in Egypt: S. M. A. Ibrahim 279

HCFC22-based Vapour Absorption Refrigeration System: Part I: Parametric Studies: M. Fatouh and S. Srinivasa Murthy 297

Studies on a Recirculating Fluidized-bed Incinerator–Cold Model: B. J. Alappat and V. C. Rane 313

Heat Transfer through a Low-pressure Gas Enclosure as a Thermal Insulator: Design Considerations: Y. Demirel and S. C. Saxena 327

Performance of Multi-bed Sorption Heat Pump Systems: W. Zheng, W. M. Worek and G. Nowakowski 339

Immersing Cooling of Large Spherical Produces: Thermal Parameters: I. Dincer and S. Dost 351

Thermodynamic Analysis, Parametric Study and Optimum Operation of the Kalina Cycle: E. D. Rogdakis 359

Issue No. 5 MAY

HCFC22-based Vapour Absorption Refrigeration Systems Part II: Influence of Component Effectiveness: M. Fatouh and S. S. Murthy 371

Evaporation of Multicomponent Liquid Fuel Droplets: P. Bhattacharya, S. Ghosal and S. K. Som 385

An Analysis of the Heat Transfer Rate and Efficiency of TE (Thermoelectric) Cooling Systems: K. Chen and S. B. Gwilliam 399

Development of a New Number (the Dincer Number) for Forced-convection Heat Transfer in Heating and Cooling Applications: I. Dincer 419

Development and Application of a Thermal Model for the Relined Ladle in China Steel Corporation: J.-D. Chen and P.-H. Wang 423

Study of the Steady and Transient Temperature Field and Heat Flow in the Combustion Chamber Components of a Medium Speed Diesel Engine Using Finite Element Analyses: C. D. Rakopoulos and G. C. Mavropoulos 437

Issue No. 6 JUNE

Thermal Performance of an Evaporatively Cooled Building: Parametric Studies: M. P. Maiya 465

HCFC22 Based Absorption Cooling Systems, Part III: Effects of Different Absorber and Condenser Temperatures: M. Fatouh and S. Srinivasa Murthy 483

Thermal Performance of an Evaporatively Cooled Building: Parametric Studies: M. P. Maiya 465

HCFC22 Based Absorption Cooling Systems, Part III: Effects of Different Absorber and Condenser Temperatures: M. Fatouh and S. Srinivasa Murthy 483

Effect of Glass Cover Inclination and Parametric Studies of Concentrator Assisted Solar Distillation System: B. Prasad and G. N. Tiwari 495

Finite-difference Prediction of Transient Indoor Temperature and Related Correlation based on the Building Time Constant: K. A. Antonopoulos and C. Tzivanidis 507

Heat Transfer Characteristics in a Small-scale Fluidized Bed Boiler: S. Tia, S. Suwanayuen, C. Tangsatitkulchai, C. Phromvichit and W. Nimipal 521

A Modelling Study for Moisture Diffusivities and Moisture Transfer Coefficients in Drying of Solid Objects: I. Dincer and S. Dost 531

A Hybrid High Efficiency Single Basin Solar Still: H. S. Varol and A. Yazar 541

A Perspective of Thermal Energy Storage Systems for Solar Energy Applications: I. Dincer and S. Dost 547

Issue No. 7 JULY

Investigation of Natural Convection in Convergent Vertical Channels: S. A. M. Said 559

Suspension-to wall Heat Transfer in a 12 MW_{th} Circulating Fluidized-bed Combustor: M. R. Golriz .. 569

Use of Tergitol-7 in Photogalvanic Cell for Solar Energy Conversion and Storage: Toluidine Blue–Glucose System: K. M. Gangotri, O. P. Regar, C. Lal, P. Kalla, K. R. Genwa and R. Meena .. 581

New Correlations for Heat Transfer Coefficients During Direct Cooling of Products: I. Dincer 587

On the Energy Resources of Canada: I. Dincer and S. Dost 595

Optimization and Control of Autonomous Renewable Energy Systems: R. Chedid and Y. Saliba 609

Strategies to Raise the Off-design Efficiency of Chiller Machines: A. Beyene and P. Lowrey 625

Experimental Investigation of Local Clays and Clay Schemes as Liners for Solar Ponds: B. A. Jubran, A. R. El-Baz, M. A. Hamdan and A. A. Badran 637

Transient Temperature Distributions in Canned Products During Heat Sterilization and Cooling: I. Dincer 643

Issue No. 8 AUGUST

Experimental Performance of the Water/Calcium Chloride System in a Heat Transformer: R. M. Barragán, C. L. Heard, V. M. Arellano, R. Best and F. A. Holland 651

Effect of Lubricating Oil Contamination on Evaporation in Refrigerants R12 and R22: H. Cawte, D. A. Saunders and G. A. Poland 633

Kinetic Measurement of the Isobutene/Water/*Tert*-butanol Chemical Heat Pump; Dehydration of *Tert*-butanol: Y. Kato, T. Honda and A. Kanzawa 681

Catalytic Combustion for Industrial Gas Turbines: D. Anson, M. DeCorso and W. P. Parks, Jr. 693

Transient Performance of a Two-dimensional Salt Gradient Solar Pond—A Numerical Study: M. M. El-Refaee, R. R. Mansour and F. Al-Juwaihel 713

Performance of a Scroll Compressor with R134a at Medium Temperature Heat Pump Conditions: C. G. Carrington, P. Bannister and Q. Liu 733

Issue No. 9 SEPTEMBER

Analytical Solution of the Inverse Unsteady Wall Heat Conduction Problem and Experimental Application: K. A. Antonopoulos and M. Vrachopoulos 745

Activities and Selectivities of Copper/Metal-oxide Catalysts at Temperatures Relevant to Chemical Heat-pumps Based on Isopropanol/Acetone Interconversions; J. Cunningham, J. N. Hickey and Z. Wang 763

Energy Efficiency of a Solar Drying System: C. Tiris, M. Tiris and I. Dincer 767

Thermodynamic Properties of Ideal Gas Air: Y. Park and R. E. Sonntag 771

A Drop-in-replacement Blend HFC-23/HCFC-22/HFC-152a for Air/Refrigerant Equipment: S. M. Sami and P. J. Tulej 787

Heuristic Approach for Heat Exchanger Networks O. A. Hamed, S. Aly and Abu-Kousa 797

Generalized Volumetric Behaviour of Refrigerants Based on a New Four-parameter Corresponding States Correlation: K. Park, R. E. Sonntag and C. Borgnakke 811

Burn-rate and Knock Reduction in the Spark Ignition Engine: P. Lappas 829

Issue No. 10 OCTOBER

Operation Control of Circulating Fluidized Bed Boilers: M. Gierse and B. Leckner 839

An Empirical Model for a Heat Pump Dehumidifier Drier: C. G. Carrington and P. Bannister 853

Performance Characteristics of HCFC-123 Ejector Refrigeration Cycles: D.-W. Sun and I. W. Eames . 871

A Generalized Methodology for Determining the Total Heat Gain througth Building Envelopes: S. K. Chou and W. L. Chang 887

Dual-fuelling of an Industrial Indirect Injection Diesel Engine by Diesel and Liquid Petroleum Gas: V. Pirouzpanah and A. Barkhordarion Mohammadi 903

The Production of Activated Carbon from a Bituminous Coal: B. A. Akash and W. S. O'Brien 913

Mathematical Modeling of Moisture Desorption in Porous Medium: S. W. Peng, K. Mizukami and W. Liu 923

Issue No. 11 NOVEMBER

A New Principle of Ignition and Flame Stability for Low-volatile Pulverized Coal with Slitted Bluff-body Burner: Shi Xuefeng, Qian Renzhang, Zhen Yuanping and Ma Xiaoqing 933

A Method to Determine Thermal Parameters of Granular Coal Particles During Devolatilization: I. Dincer and S. Dost 943

Estimation of Hourly Ambient Air Temperature Data from its Daily Averages for India: R. S. Adhikari and A. Kumar 949

Demand for Natural Gas in Kuwait: An Empirical Analysis Using Two Econometric Models: M. Nagy Eltony 957

High Pressure Ammonia Dissociation Experiments for Solar Energy Transport and Storage: K. M. Lovegrove 965

Computational and Experimental Study of Pressure Losses in Duct Transitions; G. Gan and S. B. Riffat 979

Expansion of Multi-Jet Bed with Large Particles: H.-L. Pham, J.-C. Mora and J.-C. Kita 989

On the Reconstruction of Fission Products Distribution in Nuclear Fuel Rods: C. Niculae, T. Craciunescu and R. Dobrin 999

The Impact of Crude Oil Price Fluctuations On Unemployment in the United States: N. D. Uri and R. Boyd 1003

Nitrogen Oxides Emission from a Circulating Fluidized Bed Combustor: Bo Feng, Hao Liu, J. Yuan, Z. Lin, D. Liu and B. Leckner 1015

Issue No. 12 DECEMBER

Double Diffusive Zone-boundary Migration in Solar Ponds: N. D. Kaushika, P. Avanti, M. Arulanantham and T. P. Singh 1027

Effects of Climatic Conditions on the Performance of Carnallite Solar Ponds: B. A. Jubran, A. R. El-Baz, M. A. Hamdan and A. A. Badran 1037

Demand Analysis for Solar Photovoltaic Cells—a Case Study of Gundlupet Taluk: R. Srinivasan 1049

Heat Pump Dryer. Part 1: Simulation of the Models: S. Prasertsan, P. Saen-Saby, P. Ngamsritrakul and G. Prateepchaikul 1067

Tracer Gas Technology for Airflow Measurements in HVAC Systems: K. W. Cheong 1081

Aerosol Deposition in Ventilation Ducts: N. Adam, P. Everitt and S. B. Riffat 1095

Direct Smelting and Alternative Processes for the Production of Iron and Steel; T. Zervas, J. T. McMullan and B. C. Williams 1103

K-factor Data of Interacting Duct Fittings Based on Measurement and CFD Modelling: S. J. Smith, S. B. Riffat, G. Gan and L. Shao 1129
